FORUM 2026**

15 – 17 JANUARY 2026
INTERCONTINENTAL FESTIVAL CITY, DUBAI, UAE

Level 2: Botulinum Toxin Mastery (Advanced Training)

Title: Botulinum Toxin Level 2: Advanced Techniques in Aesthetic & Therapeutic Applications

Description:

Elevate your expertise and take your Botox skills to the next level. This advanced hands-on course is designed for healthcare professionals who have completed foundational training and are ready to master precision neurotoxin treatments for the entire face and neck.

Participants will refine their anatomical knowledge and treatment planning, learning how to sculpt, balance, and rejuvenate facial features with advanced injection strategies. Course highlights include:

- **Advanced Assessment & Planning:** Customized treatment strategies for the upper face, midface, lower face, and neck.
- **Precision Techniques:** Tailored frontalis and brow injections, bunny line correction, micro-Botox lip flip, platysmal band treatment, chin reshaping, oral commissure lift, gummy smile correction, and more.
- **Therapeutic Expansion:** FDA-approved migraine treatment protocols for functional and aesthetic integration.
- **Hands-On Experience:** Live patient injections under expert supervision with full-face application, dosing, and advanced safety management.
- **Practice Integration:** Strategies to optimize patient outcomes, prevent and correct complications, and build a successful injectable practice.

This advanced course blends detailed video demonstrations with supervised live practice, giving attendees the competence and confidence to deliver high-level, customized Botox treatments that set them apart in clinical practice.
