

**15TH EROC GLOBAL
FORUM 2026**

15 – 17 JANUARY 2026
INTERCONTINENTAL FESTIVAL CITY, DUBAI, UAE

Supported By

In Conjunction with

Korean Society of Otorhinolaryngology-
Head and Neck Surgery

Course Title

Level 3: Collagen Biostimulation Training – Advanced Injectable Techniques for Skin Rejuvenation

Learning Objectives

By the end of this course, participants will be able to:

- Explain the principles of collagen biostimulation and its role in facial rejuvenation.
- Prepare and safely use hyperdiluted calcium hydroxyapatite for skin and structural support.
- Apply injection techniques for collagen induction in the face, chin, and neck.
- Perform mid-face volumization and skin smoothing for age-related changes and acne scarring.
- Evaluate and treat patients using injectable poly-L-lactic acid for gradual collagen stimulation.
- Demonstrate proper patient selection, consultation, and treatment planning for biostimulatory injectables.
- Understand integration of biostimulation with other aesthetic treatments for comprehensive rejuvenation.
- Recognize and manage potential complications, ensuring optimal patient outcomes.

Course Description

This advanced course focuses on the science and practice of collagen biostimulation, providing participants with the knowledge and techniques to integrate biostimulatory injectables into their aesthetic practice.

Through pre-course online learning, attendees will explore the mechanisms of action, preparation protocols, and treatment principles for hyperdiluted calcium hydroxyapatite and poly-L-lactic acid. Training modules include anatomy-based lectures, injection demonstrations for the face, chin, and neck, and protocols for mid-face volumization, skin smoothing, and acne scar improvement.

During the live training, participants will work under expert supervision to perform patient assessments, treatment planning, and collagen biostimulation injections. Attendees may bring their own pre-consented patients or work with course-provided volunteers.

By combining scientific understanding with practical application, this course equips practitioners to deliver natural, long-lasting results through safe and effective collagen induction therapy — expanding treatment options and elevating their aesthetic practice.
